

## Fleet Tracking

Fleet tracking offers considerable cost savings for different kind of enterprises. Fleet management service providers can help businesses to stay competitive and offer them the tools for higher productivity and better customer service.

Vehicle tracking benefits a broad range of enterprises having different business focus. Whether your business is to provide tracking services to taxi companies, managers of field employees, frozen product delivery companies or maintenance and service companies – the best-in-class tracking devices should be on your agenda. M2M Solutions and Tramigo offer a modern device purpose-made for fleet managers that allows you to improve and broaden your service offering.

We offer to fleet management service providers the best tracking device in the market and unbeatable IT tools where cost efficiency and high quality meet!

**THE BEST FLEET MANAGEMENT DEVICE.** Tramigo T23 is a professional device for advanced fleet management where additional sensors and accessories are required. It is the perfect choice for monitoring trucks, heavy machinery, cars and vans. Quality hardware with long warranty and full aftersales support make T23 ideal for fleet management service providers.

- Real-time tracking of vehicles and routes
- Easy to install
- Rich set of professional accessories available
- No monthly fees and basic fleet management software package for free

“ Upgrade your tracking device and improve your profitability, order T23 today! ”

## A DEVICE OR A COMPLETE SOLUTION, YOU CHOOSE

Depending on your business needs, you can buy from us just the T23 device and use it with your existing connectivity and/ or software provider or we can offer you the full tracking solution. Our turnkey tracking solution comprises of four integrated and tested components: hardware, software, support and connectivity.

**PROFESSIONAL FLEET MANAGEMENT BUSINESS CASE.** Tramigo T23 will impact your profitability in two ways: it increases your revenues via broader clientele and lowers your business expenses.

- **Higher revenue:** Utilize rich sensor offering and gain access to new customer groups such as truck operators with vehicle cooling systems, clients requiring driver ID recognition or heavy machinery owners
- **Low implementation expenses:** Easy vehicle installation with "Install" quick command for immediate installation setup activation
- **Decrease running expenses:** The price you pay for the device includes all updates without extra recurring charges
- **Reduce IT expenses:** Host your own server and we will offer you the access to online cloud software for free and without monthly fees. T23 is also easy to configure to report to your existing software
- **No surprises:** We offer Industry-leading 24 month international warranty and dedicated 24/7 customer service
- **Zero pre-investment financing model:** Full VTS available also based on monthly fees \*
